***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest, *inter alia*, a magnetic resonance imaging (MRI) system, comprising: a magnet assembly defining an imaging volume and at least one recessed portion; a shielded room surrounding the magnet assembly; a light source outside of the shielded room; at least one light projector within the room to direct illumination within the imaging volume, the light projector being bendable along a length; and the at least one light projector being coupled to the at least one recessed portion of the magnet assembly; and means for optically connecting the light source to the at least one light projector, said means extending through a wall of the shielded room.

Concerning the section 103(a) rejection of claim 1 using Kuth, the examiner agrees with applicant in that the cited reference does not teach that the light projector is coupled to a recessed portion of the magnet assembly. Furthermore, in claim 18 neither Kuth nor the Torchia references teach a first canopy over a first pole and a light projector connected to the first canopy, "wherein the optical fibers extend through the first canopy at a second location and out of the first canopy through the first location, into the light projector".

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
